

TC#	Feature	Test Description	Steps to Execute	Expected Result	Actual Result	P/F
TC-01	GPA	Calculate w/o values/missing inputs	Make sure inputs are empty/some are missing, click calculate	Should NOT calculate GPA / show error popup	Same as expected result. (didn't allow to calculate)	Pass
TC-02	GPA	Remove all sections and try to calculate grade	Remove all sections, click calculate	Should give an error that you need sections to calculate/ NOT allow for removing all sections	Same as expected result. (did not allow for removal of last course)	Pass
TC-03	GPA	Spam course dropdown	Repeatedly and very quickly click course dropdown buttons	Adds the number of sections that the user requested	Same as expected result. (very hard to spam bc button moves down w/ every movement, and DOES add requested sections)	Pass
TC-04	GPA	Spam grade dropdown	Repeatedly and very quickly click grade dropdown buttons	Not break, open and close rapidly, still loads	Same as expected result.	Pass
TC-05	Course	Spam "add off-campus course" button	Repeatedly and very quickly click off-campus button	Adds courses for every time the button was clicked	Same as expected result.	Pass
TC-06	Course	Try locking grades w/o logging in	Click lock grade button w/o logging in	Cannot lock, recommendation to sign in to save changes	Same as expected result. Prompts to log in. (add	Pass

					a tip/reminder?	
TC-07	Course	Type in and dropdown menu for courses	Type in a class, try to click on class in dropdown menu	Should click on first try, input class into bar	Takes multiple clicks (unknown) to select the course, only works with one try when pressing enter	Fail
TC-08	Course	Check GPA w/o any classes	Scroll down, check GPA	Should show N/A	Same as expected result. (shows N/A for both weighted + unweighted)	Pass
TC-09	Course	Remove off-campus courses when there aren't any	Click remove course button	Should NOT remove any courses	Same as expected result.	Pass
TC-10	Grades	Calculate w/ missing inputs	Tap calculate button w/ missing inputs or no inputs	Should show an error popup w/ instructions	Same as expected result. (Pop-up that says Please fill in all fields for all 1 rows before calculating.) Could be modified so button is grayed out instead like GPA page button?	Pass
TC-11	Grades	Try to add category that is already used	Add a category in dropdown that has already been used	Should show (used) in the dropdown, preventing user to click on the dropdown section	Same as expected result. (Also, used sections are grayed out)	Pass

TC-12	Grades	Add multiple Other categories	Keep adding rows w/ Other as its category	Should allow more Other categories, endlessly	Same as expected result. (allowed endless Other categories)	Pass
TC-13	Grades	Question Mark info button	Click on question mark icon	Should show info popup w/ darker background	Same as expected result.	Pass
TC-14	Log In	Log in with nonexistent account	Type in fake email and fake password	Should not allow log-in	Same as expected result. (showed Invalid email or password)	Pass
TC-15	Log In	Log in with incorrect password	Put in real account with incorrect password	Should either show error (wrong password) pop up or same as TC-14	Same as expected result. (showed Invalid email or password)	Pass
TC-16	Log In	Use forgot password	Click forgot password, input REAL email	Should send email (showing up in SPAM is ok)	Same as expected result. (prompt to reset password showed up in email)	Pass
TC-17	Log In	Continue with google	Click on continue with google	Should allow log-in with email	Same as expected result.	Pass
TC-18	Log In	Continue with github	Click on continue with github	Should allow log-in with github	Same as expected result.	Pass
TC-19	Log in	Sign up	Click on Sign Up	Should allow user to sign up with	Same as expected result.	Pass

				email, github, or google		
TC-20	Log in	Sign out	Be logged in, click sign out button	Should allow user to log-out, removing ALL data and email from upper right corner	Same as expected result. (also removed the email display in the top right corner!)	Pass
TC-21	All Pages	Open on Phone format	Open the website on a small screen (phone), tap on all pages	Should allow all functionality w/o anything sticking out or being inaccessible	Guest/email section was not aligned w/ other buttons, still functional	Fail(?) All functionality, just appearance
TC-22	All Pages	Open on Laptop format	Open the website on a medium screen (laptop, e.g. Lenovo, Mac), tap on all pages	Should allow all functionality w/o anything sticking out or being inaccessible	Same as expected result.	Pass
TC-23	Nav Bar	Navigate to all pages from other pages	Open the website, click on other pages from other pages	Should move to all pages seamlessly, no isolated page (unable to navigate to others from it)	Same as expected result.	Pass
TC-24	All Pages	Background gradient staying the same	Open any page, scroll down to the bottom and back up	Gradient should stay constant and not reset, only 1 gradient across pages	Gradient repeats every screen-length, more noticeable on longer pages	Fail
TC-25	Courses	Credit Prog and Off-Campus Credits are sticky	Scroll to the bottom of Courses Page	Credit Prog and Off-Campus Credits should stay at the top, scrolling with the rest of the page	CP and OCC stick to the top edge consistently, scrolling weirdly	Fail

TC-26	Courses	Incorrect weighting for courses	Try putting honors classes and calculate GPA	Should calculate GPA properly, only weighting IM3H and AP	Weights random Honors classes AND AP, serving a biased GPA	Fail
-------	---------	---------------------------------	--	---	--	------

Suggestions (if time allows):

1. Fix functionality bugs
2. Add minimum page size, then expand based on content
3. Some error message replaced with button grayout (calculate button) , others turned into popup (like schedule loaded etc.)
4. Search course dropdown menu functionality improvement (space in between course name and category after, everything is alphabetically ordered, add a search by category button/function?)
5. Add option to choose same grade for many courses at once (A, B, etc.)
6. Lock for off campus course?
7. Top right displays username and profile picture?
8. Add app name and logo?
9. Improve styling and spacing (GPA page + calculator matches other pages, ? popup improved, add shadows, color change and popup for hover.)
