

BUG#	Related TC	Description + Steps to Reproduce	Expected vs Actual	Severity	Status
BUG-01	TC-07	Type in a class, try to click on class in dropdown menu	Should allow click on the first time, actually takes a long time and re-using the dropdown... only consistently works with the enter button	High	Fixed
BUG-02	TC-21	Open the website on a small screen (phone), tap on all pages	Should have Guest/email label stack neatly w/ the rest of the labels, instead overlapping over the actual labels. Most likely because the Guest is not in the UK with the rest of the labels, b/c it had to be taken out to align to the right.	Medium	Fixed
BUG-03	TC-24	Open any page, scroll down to the bottom and back up	Gradient should stay constant and not reset, only 1 gradient across pages	Low	Fixed
BUG-04	TC-25	Scroll down on Course Selection Page	Should pin external courses/credits to the top, instead goes all the way to the bottom, making it harder to see the GPA	Low	Fixed
BUG-05	TC-26	Check all honors courses and see if they are weighted or not (better to check in code itself...)	Should NOT put weight on all honors courses, only on IM3H and AP classes	High	Fixed

BUG-06	TC-	Steps: 1. ... 2. ...	Expected: Actual:	☐ Crit High ☐ Med ☐ Low	☐ Open ☐ In Prog ☐ Fixed
